DREW FOSTER

FULL-STACK SOFTWARE DEVELOPER

(909) 358-5018 | BEAUMONT, CA | DREW.NG3NUITY@GMAIL.COM | WWW.DRFALCOEW.COM

Objective

To obtain a challenging developer position in a dynamic and innovative organization where I can utilize my technical and creative skills to develop scalable and reliable systems and applications.

Skills & abilities

Experienced in React/Typescript, CSS, Java, Quarkus/Spring framework, YAML, Bash, Python, and Swift; Amazon Web Services (AWS), Office 365; proficient in OOP, communication, teamwork, and problem-solving.

Experience

DECEMBER TECH
Associate Software Engineer | June 2022 – July 2023

- Developed and maintained responsive, user-friendly and visually appealing websites using React, Typescript, and CSS.
  Implemented robust and efficient data processing and retrieval mechanisms in the API, utilizing the Quarkus backend framework and Java to ensure high performance, reliability, and scalability for our application.
- Hosted site on AWS, leveraging various AWS features for optimal performance and scalability.
- Automated numerous manual processes using efficient scripts, resulting in improved productivity and time saved.

IFIT HEALTH & FITNESS

Python developer | 2021 - 2022

- Built automation software to take over the previously manual task which was to process and format large amounts of online orders into excel into various shipping programs.
- I increased efficiency in one workflow by 20x and in another by 100x, resulting in significant savings for the company in labor costs and reducing the overall error rate by 99%.

Personal Projects

LUCRUMWEB.COM | 2024

A digital marketing agency site hosted on AWS S3 and built with React

RIRISJEWELRY.COM | 2024

Jewelry Store website hosted on S3 and built with React, and a Java/Quarkus API with Stripe API integration hosted on AWS
